Experience

Ascension Marketing Group — Associate Web Developer Sep 2025 - Current

- Maintained and extended a large-scale ecommerce platform in Laravel, providing new features for over 750,000 customers.
- Built reusable components with Vue.js, improving internal workflow with new dashboards replacing spreadsheets and external software.
- Integrated Salesforce and Docusign APIs to automate customer document signing and sync Salesforce object updates.
- Built customer-facing tools in Alpine.js, including a loan estimation calculator, limited-time product listings, and product video carousel integration.

Clip Art Monster — Web Developer Intern May 2025 - Sep 2025

- Designed and built responsive web pages using HTML, CSS, and JavaScript on a Django backend.
- Redesigned the search and filters page with smoother animations and clearer visual hierarchy.
- Collaborated with team members to translate mockups into functioning UI, closing the gap between visual design and shipped product.

Berry College — Teaching Assistant Aug 2024 - May 2025

- Supported over 40 students with 3D modeling, electronics, and Java courses, helping improve student understanding and homework completion.
- Debugged student circuit and code issues 1:1, translating abstract concepts into concrete, hands-on explanations.

Education

Berry College — Mount Berry, Georgia Aug 2022 - May 2025

Bachelor of Science in Creative Technologies GPA: 3.96

Skills

Design: Autodesk Fusion 360, Photoshop, Illustrator, Premiere Pro, Animate, After Effects, Figma

Programming: Laravel, Vue.js, Alpine.js, React, HTML, TailwindCSS, CSS, JavaScript, C++ (Arduino), SQL, PHP, Git, WordPress

Projects

Monovox — an interactive analog synthesizer

- Designed and fabricated a custom PCB, soldering and debugging over 150 components to drive an analog synthesizer and touchscreen visuals.
- Programmed the touchscreen UI in C++ on an ESP32, providing a real-time sound wave visualization, a basics of synthesis learning dashboard, and an audio-reactive tamagotchi game.
- 3D modeled and printed an enclosure that seamlessly took the project from bare PCB to a finished, usable product.

runTime — run tracking website

- Built a full-stack run-tracking app (HTML, PHP, SQL) that dynamically tailors exercise recommendations to each user's logged data.
- User-tested with 7 participants to gather data on average college student exercise habits.
